

## Unitel Celebrates 20-Year Anniversary

*Locally Owned and Operated  
Telecommunications Company  
Continues To Exceed Customer  
Expectations*

BOSTON, MA – July 17, 2007 - Unitel an industry leader in business communications is celebrating the company's 20-year anniversary of delivering cutting edge technology in voice and data applications to customers in Massachusetts and Rhode Island as well as many parts of the United States.

In August of 1987, Mark Worster founded Unitel with his brother in Easton, MA. Mr. Worster started by providing a higher level of service to business customers for their phone system needs than what the regional telephone company was offering at the time. This simple business plan has been the core philosophy of Unitel for 20 years and has enabled the company to grow ever since.

"It is a truly amazing feeling to achieve such a significant milestone, especially in a business environment where companies come and go almost on a daily basis," said Mr. Worster, president of Unitel. "Our longevity can be directly attributed to our great employees that care about our customers and the exceptional service they strive to provide everyday. Since our inception Unitel's mission has been to provide our customers with superior voice and data solutions through exceptional technical expertise in design, installation and service of quality and innovative communications products. We've built strong partnerships with

quality vendors and leading equipment manufacturers for the benefit of our customers and we made a commitment years ago to customize solutions that continually exceed their expectations."

As technology has changed over the years, Unitel has maintained its position at the forefront by expanding its services to include voice over IP (VoIP), structured cabling, call center applications, wireless, data networking, video surveillance, and Internet services. With the recent convergence of voice and data applications, Unitel continues to train and certify its business consultants and technical staff on this ever changing and increasingly complex technology. In 2005, Unitel launched the Current Technology Assurance Plan (C-TAP). This unique program gives businesses a way to eliminate obsolescent technology and refresh their systems annually without an upfront capital investment. As a result, Unitel helps customers deploy and embrace new solutions giving them a competitive advantage, while increasing their profitability.

"We're extremely proud to have built Unitel into the company that it is today," stated Mr. Worster. "We have been very fortunate to have worked with some reputable organizations that have been with us since day one. We're excited about the future of bringing new technology to all of our customers."

### **ABOUT UNITEL, INC.**

Unitel is a (20) year old provider of state-of-the-art communication systems designed to increase your profitability or provide you with a competitive advantage. Their product portfolio ranges from telephone systems to network hardware and support. Unitel delivers solutions using industry certified technical professionals dedicated to your satisfaction.
