

Network Access Data Vaulting

Unitel would like to introduce our customers to Network Access Data Vaulting. Network Access Data Vaulting is a comprehensive service providing state-of-the-art offsite data protection at an affordable price. The focus of Network Access Data Vaulting is an automated, reliable and secure backup solution that enables 24x7x365 access to your data for immediate restoration.

Data Vaulting has proven itself to be far more reliable and efficient than first generation of online backup technology or tape backup environments. Data Vaulting has been thoroughly tested and certified by leading technology infrastructure providers and used by many enterprise-level companies. We are now able to offer it as a cost effective solution to the small and medium sized business as well.

Network Access Data Vaulting offers fast and reliable data recovery. Whether you are restoring a single file, or your entire system, Network Access Data Vaulting is the best solution available.

Designed for high performance backup and recovery, Network Access Data Vaulting protects your critical business data automatically at a secure offsite data center. Whether you are managing a small office or many servers, Network Access Data Vaulting

provides the same ease-of-use and efficiency.

SERVICE OVERVIEW

Network Access Data Vaulting is a powerful and easy-to-use solution designed to provide data protection to all businesses.

How Our Service Works

- Software is installed
- Initial backup (Seed)
- Automated schedule established
- Data is encrypted and compressed prior to offsite transfer
- Up to 30 versions can be stored onsite locally
- Data is transferred offsite and a report is generated
- Data is held on hard drive disk arrays for rapid online recovery
- Data is backed up again, providing a second offsite copy
- Data can be restored point and click or USB device can be shipped overnight
- Backups are monitored daily

How We Do It

3-Stage Data Reduction

Process

Compression

Common File

Elimination/De-duplication

Delta Block Technology

(4k)

- **Value** – Significantly reduces the amount of billable data.
- **Competition** – 99% of the competition does not deploy all of these processes. Without these processes the competition could have up to 7x the amount of billable data resulting in a significantly higher monthly cost of service.

Our goal is to provide our clients with a very simple and reliable backup, recovery, and data management solution. We exist on the value of that reliability. If you would like to find out how Data Vaulting can provide you with a complete, automated backup strategy and solution, please contact us at (781) 575-9696 and we will arrange for a complementary evaluation account.
